PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 0182

SESSION NUMBER: 1

DATE OF SESSION: 4 MAY 88

DATE OF REPORT: 4 MAY 88

START: 0837

END: 0905

METHODOLOGY: CRV

VIEWER IDENTIFIER: 025

1. (S/NF/SK) MISSION: The initial session in the CRV portion of this project's remote viewing training program. Site was mid-Atlantic ocean.

2. (S/NF/SK) VIEWER TASKING: Coordinates 1012/1042.

3. (S/NF/SK) COMMENTS: The presence of an observer in the RV room proved to be distracting; this procedure will be discontinued until a comfortable trainer-trainee rapport has become established. In the interim, session observation will take place (remotely) from the control room.

PI - 025 was extremely "expectant"; this due primarily to the (mis)perception, based upon the lectures, that the "magic" (i.e., ideogram, etc.) would occur spontaneously from the very start--that it did not have to be taught. Consequently, a certain degree of (angst) was present on 025's part throughout the session because ideograms did not "feel spontaneous". Also, 025 seems by nature to be very impatient--but really apprehensive--of failing to meet what the viewer perceives as the performance standards. This behavior is normal on the part of a new trainee. ?

In this initial session the trainer was dedicated to:

- 1) Counteracting the negative effects of the above; educating 025 about the pace and manner in which training proceeds--imbuing the trainee with a sense of the proper expectations.
- 2) Acquainting the viewer with the format (familiarization with the transcript layout) and mechanics of a CRV session; emphasizing structure vs "getting the site".
- 3) Establishing a comfortable working relationship with the new trainee.
